

Wounded Warrior Project Testifies Before Senate and House Veterans' Affairs Committees on Toxic Exposure Legislation

WASHINGTON, May 5, 2021 /[PRNewswire](#)/ -- Wounded Warrior Project® (WWP) government affairs specialist Aleks Morosky recently testified before the Senate and House Committees on Veterans' Affairs, encouraging Congress to take action on toxic exposure legislation. The health issues caused by burn pits and other toxic chemicals remain a critical issue facing post-9/11 wounded veterans — and a top legislative priority for WWP.

"Wounded Warrior Project believes that veterans of all eras who suffered toxic exposures deserve access to lifesaving health care and a system that requires VA to respond to scientific data in a timely, transparent manner," Morosky said. "We're pleased with the legislation that has been introduced to reform these problems. However, time is of the essence; these warriors are sick, and some are dying, waiting for the care they have earned. We call upon Congress to pass these important bills without delay."

Read WWP's list of recommendations to the [House](#) and [Senate](#) Veterans' Affairs Committees

WWP is supporting complementary pieces of legislation that will reform existing policies and improve access to care and eligibility criteria, including:

- [S.927](#) / [H.R.2127](#) *Toxic Exposures in the American Military (TEAM) Act*
- [S.952](#) / [H.R.2372](#) *Presumptive Benefits for War Fighters Exposed to Burn Pits and Other Toxins Act*
- [S.437](#) / [H.R.2436](#) *Veterans Burn Pits Exposure Recognition Act*
- [H.R.2368](#) *The Conceding Our Veterans' Exposures Now and Necessitating Training (COVENANT) Act*

Collectively, these pieces of legislation will accomplish the following objectives:

- Grant VA health care enrollment eligibility to all veterans who suffered toxic exposures while in service, regardless of their service-connected disability claim status.
- Establish presumptive service connection for more than 20 cancers and respiratory conditions that Gulf War and post-9/11 veterans who were exposed to burn pits and other toxic substances experience.
- Adopt a framework that requires VA to establish presumptive service connection when there is scientific evidence of association between all toxic exposures and illnesses.
- Concede exposure to burn pits or other toxic substances to ease the evidentiary burden on deployed Gulf War and post-9/11 veterans when filing claims for direct service connection.
- Improve toxic exposure training for VA personnel.
